

San Diego FAAS Team presents:

My Crash at Catalina Airport - Learn from my Mistakes

Dave has generously and courageously offered to share his harrowing story with the hopes that others can learn from his errors. He will cover, among other things: His flight into Fallbrook the previous day when, as he realized he had a tailwind on final, did a go-around and landed the opposite direction and afterwards reflects, why didn't this stick with him the next day? Details of the incident prior to, during and after flight. His mindset with regard to non-pilot passengers, overconfidence etc. Photos of injuries and damage to aircraft. Questions to ask yourself: What are your personal minimums and do you stick to them? Is going around an automatic and spontaneous reaction? When is the last time you practiced stalls/slips/go arounds/aborted takeoffs/crosswind landings/engine out landings/etc?

Directions: The meeting will be held at the Palomar Airport Administration Building which is the first structure on the left as you enter the airport property. Please proceed past the building to the main parking lot which is down a short grade on the left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
